

Direct Drive Model 60030K

Compact direct drive pump assembly for commercial or residential installations. The low noise level makes it easy to work with. The pump features an internal adjustable pressure regulator (200-1000 psi max.) Has a 4-15 nozzle capacity depending on nozzle flow rate.

Can be placed up to 1250 ft away from mist line for optimum operation.

- Direct drive CAT Pump Model 1DX03ELS
- Stainless steel plunger design
- 0.33 GPM at 1000 PSI flow rate
- Internal adjustable pressure regulator with pressure gauge
- Positive displacement pump
- 1/2 HP Emerson TEFC electric motor 120 VAC or 220 VAC; 50/60Hz 7Amps
- 5 Micron replaceable filter cartridge
- Size: 10' W x 24" L x 12" H, 53 lbs. depending on model
- Auto drain valve
- Equipt with a 6' electrical cord

Nozzle Capacity:

• 1000 PSI Pump Capacity:

7-15 .008 Misting Nozzles
5-10 .012 Misting Nozzles
4-8 .014 Misting Nozzles
